A notice of the proposed rule change for publication in the <u>Federal Register</u> is at <u>Exhibit 1</u> and the text of the amended Exchange Rule is at <u>Exhibit 5</u>.

3. <u>Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis</u> for, the Proposed Rule Change

a. <u>Purpose</u>

The Exchange proposes to extend the implementation delay of Qualified Contingent Cross Order⁴ functionalities on GEMX. During the replatform to INET, the Exchange initially delayed the implementation of Qualified Contingent Cross Order functionality.⁵ At that time, the Exchange noted the Exchange would introduce the Qualified Contingent Cross on GEMX within one year from the date of filing SR-ISEGemini-2016-17, otherwise the Exchange would file a rule proposal with the Commission to remove this rule. The Exchange filed the initial rule change on December 16, 2016.⁶ The proposed extended delay will permit the Exchange additional time to test and implement this functionality on INET. The Exchange proposes to amend the rule text in GEMX Rule 721 (Crossing Orders) to note that this QCC functionality will be available on or before March 31, 2018, to be announced to Members in an Options Trader Alert.⁷

(b) Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁸ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁹ in particular,

in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest because the Exchange desires additional time to test and implement this functionality on INET.

The Exchange believes that further delaying the implementation of the Qualified Contingent Cross Order functionality on GEMX is consistent with the Act and protects investors and public interest because the Exchange is allowing additional time to test this technology before implementing it on INET. The Exchange believes that additional testing will ensure a successful roll-out. Members are already aware that this functionality is delayed. The Exchange will provide Members notice of the date when the functionality will be available. This functionality will be available on or before March 31, 2018. This proposed delay was announced to Members recently in an Options Traders Alert. 10

4. <u>Self-Regulatory Organization's Statement on Burden on Competition</u>

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intra-market competition because all Members uniformly will not be able to submit Qualified Contingent Cross Orders during the extended implementation delay.

No written comments were either solicited or received.

Extension of Time Period for Commission Action
 Not applicable.

7. <u>Basis for Summary Effectiveness Pursuant to Section 19(b)(3) or for Accelerated Effectiveness Pursuant to Section 19(b)(2)</u>

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(iii)¹¹ of the Act and Rule 19b-4(f)(6) thereunder¹² in that it effects a change that: (i) does not significantly affect the protection of investors or the public interest; (ii) does not impose any significant burden on competition; and (iii) by its terms, does not become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest.

The Exchange believes that the proposed rule change does not significantly affect the protection of investors or the public interest. The Exchange desires to rollout this functionality at a later date to allow additional time to test this technology on the new platform. Members are already aware that this functionality is delayed. The Exchange will provide Members notice of the date when the functionality will be available. The Exchange does not believe the proposed rule change imposes any significant burden on competition because all Members uniformly will not be able to submit Qualified Contingent Cross Orders during the extended implementation delay.

Furthermore, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file a proposed rule change under that subsection at least five business days prior to the date of filing, or such shorter time as

designated by the Commission. The Exchange has provided such notice.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁸ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁹ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest because the Exchange desires additional time to test and implement this functionality on INET.

B. <u>Self-Regulatory Organization's Statement on Burden on Competition</u>

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.
