The self-regulatory organization may choose to attach as Exhibit 5 proposed changes to rule text in place of providing it in Item I and which may otherwise be more easily readable if provided separately from Form 19b-4. Exhibit 5 shall be considered part of the proposed rule change

Partial Amendment

Add Remove View

--

If the self-regulatory organization is amending only part of the text of a lengthy proposed rule change, it may, with the Commission's permission, file only those portions of the text of the proposed rule change in which changes are being made if the filing (i.e. partial amendment) is clearly understandable on its face. Such partial amendment shall be clearly identified and marked to show deletions and additions.

1. Text of the Proposed Rule Change

(a) Nasdaq ISE, LLC (“ISE” or “Exchange”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)¹ and Rule 19b-4 thereunder,² is filing with the Securities and Exchange Commission (“SEC” or “Commission”) a proposal to increase the Exchange’s port fees in Options 7, Section 7.C.

While these amendments are effective upon filing, the Exchange has designated the proposed amendments to be operative on January 1, 2025.

A notice of the proposed rule change for publication in the Federal Register is attached as Exhibit 1. The text of the proposed rule change is attached as Exhibit 5.

(b) Not applicable.

(c) Not applicable.

2. Procedures of the Self-Regulatory Organization

The proposed rule change was approved by senior management of the Exchange pursuant to authority delegated by the Board of Directors (the “Board”). Exchange staff will advise the Board of any action taken pursuant to delegated authority. No other action is necessary for the filing of the rule change.

Questions and comments on the proposed rule change may be directed to:

Sun Kim
Senior Associate General Counsel
Nasdaq, Inc.
646-420-7816

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

3. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

a. Purpose

The purpose of the proposed rule change is to increase the Exchange’s connectivity fees in Options 7, Section 7.C for the Specialized Quote Feed (“SQF”) Ports³ and SQF Purge Ports⁴ by 8%.⁵

Options 7, Section 7.C(i) includes the Exchange’s fees that relate to the SQF Ports and SQF Purge Ports that Market Makers⁶ use to connect to the Exchange. Today, the Exchange assesses all Market Makers an SQF Port fee of \$1,100 per port per month and an SQF Purge Port Fee of \$1,100 per port per month. The Exchange now proposes to increase the foregoing fees by 8% so that the amended SQF Port and amended SQF Purge Port fees would each become \$1,185 per port per month.⁷

³ "Specialized Quote Feed" or "SQF" is an interface that allows Market Makers to connect, send, and receive messages related to quotes, Immediate-or-Cancel Orders, and auction responses to the Exchange. Features include the following: (1) options symbol directory messages (e.g., underlying instruments); (2) System event messages (e.g., start of trading hours messages and start of opening); (3) trading action messages (e.g., halts and resumes); (4) execution messages; (5) quote messages; (6) Immediate-or-Cancel Order messages; (7) risk protection triggers and purge notifications; (8) opening imbalance messages; (9) auction notifications; and (10) auction responses. Market Makers may only enter interest into SQF in their assigned options series. Immediate-or-Cancel Orders entered into SQF are not subject to the Order Price Protection, Market Order Spread Protection, and Size Limitation Protection in Options 3, Section 15(a)(1)(A), (1)(B), and (2)(B) respectively. See Supplementary Material .03(c) to Options 3, Section 7.

⁴ The SQF Purge Interface only receives and notifies of purge requests from the Market Maker. See Supplementary Material .03(c) to Options 3, Section 7.

⁵ The Exchange initially filed the proposed pricing change on October 18, 2024 (SR-ISE-2024-51). On December 3, 2024, the Exchange withdrew that filing and replaced it with SR-ISE-2024-57. On December 17, 2024, the Exchange withdrew that filing and replaced it with SR-ISE-2024-59. On December 20, 2024, the Exchange withdrew that filing and replaced it with SR-ISE-2024-61. On December 31, 2024, the Exchange withdrew that filing and replaced it with this one.

⁶ The term “Market Makers” refers to “Competitive Market Makers” and “Primary Market Makers” collectively. See Options 1, Section 1(a)(21).

⁷ The Exchange notes that an 8% fee increase actually comes to \$1,188 per port. However, the Exchange is rounding down to the nearest 5 (i.e., \$1,185) for this proposal.

The proposed fee increases would enable the Exchange to maintain and improve its market technology and services to remain competitive with its peers. Over the years, customer demand for risk protections and capacity has increased. The Exchange continues to invest in maintaining, improving, and enhancing its protocols like SQF Ports and SQF Purge Ports for the benefit and often at the behest of its customers. Such enhancements include refreshing hardware, upgrading risk protections and information security, and offering customers additional capacity. Nevertheless, the Exchange has not increased the fees for SQF Ports and SQF Purge Ports since 2017⁸ (where inflation has been 8.62%, as measured using the metric described below). As such, the Exchange proposes to increase its fees by 8% to align to the inflation that has occurred since 2017.

As discussed below, the Exchange proposes to adjust its fees by an industry- and product-specific inflationary measure. It is reasonable and consistent with the Act for the Exchange to recoup its investments, at least in part, by adjusting its fees. Continuing to operate at fees frozen at 2017 levels impacts the Exchange's ability to enhance its offerings and the interests of market participants and investors.

The fee increases the Exchange proposes are based on an industry-specific Producer Price Index ("PPI"), which is a tailored measure of inflation.⁹ As a general matter, the Producer Price Index is a family of indexes that measures the average change over time in selling prices received by domestic producers of goods and services. PPI measures price change from the perspective of the seller. This contrasts with other metrics, such as the Consumer Price Index ("CPI"), that measure price change from the

⁸ See Securities Exchange Act Release No. 81882 (October 16, 2017), 82 FR 48865 (October 20, 2017) (SR-ISE-2017-87).

⁹ See <https://fred.stlouisfed.org/series/PCU51825182#0>.

purchaser's perspective.¹⁰ About 10,000 PPIs for individual products and groups of products are tracked and released each month.¹¹ PPIs are available for the output of nearly all industries in the goods-producing sectors of the U.S. economy—mining, manufacturing, agriculture, fishing, and forestry—as well as natural gas, electricity, and construction, among others. The PPI program covers approximately 69 percent of the service sector's output, as measured by revenue reported in the 2017 Economic Census.

For purposes of this proposal, the relevant industry-specific PPI is the Data Processing and Related Services PPI (“Data PPI”), which is an industry net-output PPI that measures the average change in selling prices received by companies that provide data processing services.

The Data PPI was introduced in January 2002 by the Bureau of Labor Statistics (“BLS”) as part of an ongoing effort to expand Producer Price Index coverage of the services sector of the U.S. economy and is identified as NAICS - 518210 in the North American Industry Classification System.¹² According to the BLS “[t]he primary output of NAICS 518210 is the provision of electronic data processing services. In the broadest sense, computer services companies help their customers efficiently use technology. The processing services market consists of vendors who use their own computer systems—often utilizing proprietary software— to process customers’ transactions and data. Companies that offer processing services collect, organize, and store a customer’s transactions and other data for record-keeping purposes. Price movements for the

¹⁰ See <https://www.bls.gov/ppi/overview.htm>.

¹¹ See *id.*

¹² NAICS appears in table 5 of the PPI Detailed Report and is available at <https://data.bls.gov/timeseries/PCU518210518210>.

NAICS 518210 index are based on changes in the revenue received by companies that provide data processing services. Each month, companies provide net transaction prices for a specified service. The transaction is an actual contract selected by probability, where the price-determining characteristics are held constant while the service is repriced. The prices used in index calculation are the actual prices billed for the selected service contract.”¹³

The Exchange believes the Data PPI is an appropriate measure to be considered in the context of the proposed pricing changes because the Exchange uses its “own computer systems” and “proprietary software,” i.e., its own data center and proprietary matching engine software, respectively, to collect, organize, store and report customers’ transactions in U.S. options securities on the Exchange’s proprietary trading platform. In other words, the Exchange is in the business of data processing and related services via its data center and proprietary matching engine software.

For purposes of this proposed rule change, the Exchange examined the Data PPI value for the period from October 2017 to October 2024. The Data PPI had a starting value of 106.7 in October 2017 and an ending value of 115.902 in October 2024, a 8.62% increase. This data indicates that companies who are also in the data storage and processing business have generally increased prices for a specified service covered under NAICS 518210 by an average of 8.62% during this period. Based on that percentage change, the Exchange proposes to make a one-time fee increase of 8%, which reflects an

¹³ See <https://www.bls.gov/ppi/factsheets/producer-price-index-for-the-data-processing-and-related-services-industry-naics-518210.htm>.

increase covering roughly the entire period since the last price adjustments to these fees were made.

The Exchange further believes the Data PPI is an appropriate measure for purposes of the proposed rule change on the basis that it is a stable metric with limited volatility, unlike other consumer-side inflation metrics. In fact, the Data PPI has not experienced a greater than 2.16% increase for any one calendar year period since Data PPI was introduced into the PPI in January 2002. The average calendar year change from January 2002 to December 2023 was .62%, with a cumulative increase of 15.67% over this 21-year period. The Exchange believes the Data PPI is considerably less volatile than other inflation metrics such as CPI, which has had individual calendar-year increases of more than 6.5%, and a cumulative increase of over 73% over the same period.¹⁴

The Exchange believes the Data PPI, and significant investments into, and enhanced performance of, the Exchange support the reasonableness of the proposed fee increases.¹⁵

b. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,¹⁶ in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,¹⁷ in particular, in that it provides for the equitable allocation of reasonable dues, fees, and

¹⁴ See <https://www.usinflationcalculator.com/>.

¹⁵ See supra discussion of SQF Port and SQF Purge Port enhancements. Additionally, other exchanges have filed for increases in certain fees, based in part on comparisons to inflation. See, e.g., Securities Exchange Act Release Nos. 34-100994 (September 10, 2024), 89 FR 75612 (September 16, 2024) (SR-NYSEARCA-2024-79); and 34-101519 (November 5, 2024), 89 FR 89071 (November 12, 2024) (SR-CboeBYX-2024-039).

¹⁶ 15 U.S.C. 78f(b).

¹⁷ 15 U.S.C. 78f(b)(4) and (5).

other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

This belief is based on two factors. First, the current fees do not properly reflect the quality of the SQF and SQF Purge Ports, as fees for these offerings have been static in nominal terms, and therefore falling in real terms due to inflation. Second, the Exchange believes that investments made in enhancing the risk protections and capacity of SQF and SQF Purge Ports has increased the performance of these offerings.

The Proposed Rule Change Is Reasonable

As noted above, the Exchange has not increased any of the fees included in the proposal since 2017. However, in the years following the last fee increases, the Exchange has made significant investments in upgrades to its SQF Ports and SQF Purge Ports, enhancing the quality of its services, as measured by, among other things, increased capacity. In other words, Exchange customers have greatly benefitted, while the Exchange's ability to recoup its investments has been hampered. Between 2017 and 2024, the inflation rate is 3.66% per year, on average, producing a cumulative inflation rate of 28.63%.¹⁸ Using the more targeted inflation number of Data PPI, the cumulative inflation rate was 8.62%. The Exchange believes the Data PPI is a reasonable metric to base this fee increase on because it is targeted to producer-side increases in the data processing industry.

Notwithstanding inflation, as noted above, the Exchange has not increased its fees at all for seven years for the SQF and SQF Purge Ports. The proposed fee changes represent a modest increase from the current fees. The Exchange believes the proposed

¹⁸ See <https://www.officialdata.org/us/inflation/2017?amount=1>.

fee increase is reasonable in light of the Exchange's continued expenditure in maintaining a robust technology ecosystem. Furthermore, the Exchange continues to invest in maintaining and enhancing its port products – for the benefit and often at the behest of its customers and global investors. Such enhancements include refreshing several aspects of the technology ecosystem including software, hardware, and network while introducing new and innovative products. The goal of the enhancements discussed above, among other things, is to provide more modern connectivity to the match engine. Accordingly, the Exchange continues to expend resources to innovate and modernize its technology so that it may benefit its members in offering SQF and SQF Purge Ports.

The Proposed Fees Are Equitably Allocated and Not Unfairly Discriminatory

The Exchange believes that the proposal represents an equitable allocation of reasonable dues, fees, and other charges because they would apply uniformly to all Market Makers that subscribe to SQF and SQF Purge Ports to quote on the Exchange. Market Makers are the only market participants that are assessed SQF Port and SQF Purge Port fees because they are the only market participants that are permitted to quote on the Exchange.¹⁹ These liquidity providers are critical market participants in that they are the only market participants that provide liquidity to the Exchange on a continuous basis. SQF Ports and SQF Purge Ports are only utilized in a Market Maker's assigned options series.

¹⁹ Unlike other market participants, Market Makers are subject to market making and quoting obligations. See Options 2, Sections 4 and 5.

4. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed pricing changes will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Intra-market Competition

The Exchange believes that the proposed fees do not put any market participants at a relative disadvantage compared to other market participants. As noted above, the Exchange would apply the proposed 8% increase to the SQF Port and SQF Purge Port fees to all Market Makers uniformly. Market Makers are the only market participants that are assessed SQF Port and SQF Purge Port fees because they are the only market participants that are permitted to quote on the Exchange. These liquidity providers are critical market participants in that they are the only market participants that provide liquidity to the Exchange on a continuous basis. SQF Ports and SQF Purge Ports are only utilized in a Market Maker's assigned options series.

Intermarket Competition

The Exchange believes that the proposed fees do not impose a burden on intermarket competition or on other SROs that is not necessary or appropriate. In determining the proposed fees, the Exchange utilized an objective and stable metric with limited volatility. Utilizing Data PPI over a specified period of time is a reasonable means of recouping the Exchange's investment in maintaining and enhancing its port offerings such as the SQF and SQF Purge Ports. The Exchange believes utilizing Data PPI, a tailored measure of inflation, to increase the fees for the SQF Port and SQF Purge Port, to recoup the Exchange's investment in maintaining and enhancing such offerings would not impose a burden on intermarket competition.

5. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

6. Extension of Time Period for Commission Action

Not applicable.

7. Basis for Summary Effectiveness Pursuant to Section 19(b)(3) or for Accelerated Effectiveness Pursuant to Section 19(b)(2)

Pursuant to Section 19(b)(3)(A)(ii) of the Act,²⁰ the Exchange has designated this proposal as establishing or changing a due, fee, or other charge imposed by the self-regulatory organization on any person, whether or not the person is a member of the self-regulatory organization, which renders the proposed rule change effective upon filing.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

8. Proposed Rule Change Based on Rules of Another Self-Regulatory Organization or of the Commission

The proposal has similarities to a proposal filed with the Commission by NYSE Arca.²¹

9. Security-Based Swap Submissions Filed Pursuant to Section 3C of the Act

EXHIBIT 1

SECURITIES AND EXCHANGE COMMISSION
(Release No. _____ ; File No. SR-ISE-2024-64)

January __, 2025

Self-Regulatory Organizations; Nasdaq ISE, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Increase the Exchange's Port Fees in Options 7, Section 7.C

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹, and Rule 19b-4 thereunder,² notice is hereby given that on December 31, 2024, Nasdaq ISE, LLC ("ISE" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to increase the Exchange's port fees in Options 7, Section 7.C. While these amendments are effective upon filing, the Exchange has designated the proposed amendments to be operative on January 1, 2025.

The text of the proposed rule change is available on the Exchange's Website at <https://listingcenter.nasdaq.com/rulebook/ise/rules>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to increase the Exchange's connectivity fees in Options 7, Section 7.C for the Specialized Quote Feed ("SQF") Ports³ and SQF Purge Ports⁴ by 8%.⁵

³ "Specialized Quote Feed" or "SQF" is an interface that allows Market Makers to connect, send, and receive messages related to quotes, Immediate-or-Cancel Orders, and auction responses to the Exchange. Features include the following: (1) options symbol directory messages (e.g., underlying instruments); (2) System event messages (e.g., start of trading hours messages and start of opening); (3) trading action messages (e.g., halts and resumes); (4) execution messages; (5) quote messages; (6) Immediate-or-Cancel Order messages; (7) risk protection triggers and purge notifications; (8) opening imbalance messages; (9) auction notifications; and (10) auction responses. Market Makers may only enter interest into SQF in their assigned options series. Immediate-or-Cancel Orders entered into SQF are not subject to the Order Price Protection, Market Order Spread Protection, and Size Limitation Protection in Options 3, Section 15(a)(1)(A), (1)(B), and (2)(B) respectively. See Supplementary Material .03(c) to Options 3, Section 7.

⁴ The SQF Purge Interface only receives and notifies of purge requests from the Market Maker. See Supplementary Material .03(c) to Options 3, Section 7.

⁵ The Exchange initially filed the proposed pricing change on October 18, 2024 (SR-ISE-2024-51). On December 3, 2024, the Exchange withdrew that filing and replaced it with SR-ISE-2024-57. On December 17, 2024, the Exchange withdrew that filing and replaced it with SR-ISE-2024-59. On December 20, 2024, the Exchange withdrew that filing and replaced it with SR-ISE-2024-61. On December 31, 2024, the Exchange withdrew that filing and replaced it with this one.

Options 7, Section 7.C(i) includes the Exchange's fees that relate to the SQF Ports and SQF Purge Ports that Market Makers⁶ use to connect to the Exchange. Today, the Exchange assesses all Market Makers an SQF Port fee of \$1,100 per port per month and an SQF Purge Port Fee of \$1,100 per port per month. The Exchange now proposes to increase the foregoing fees by 8% so that the amended SQF Port and amended SQF Purge Port fees would each become \$1,185 per port per month.⁷

The proposed fee increases would enable the Exchange to maintain and improve its market technology and services to remain competitive with its peers. Over the years, customer demand for risk protections and capacity has increased. The Exchange continues to invest in maintaining, improving, and enhancing its protocols like SQF Ports and SQF Purge Ports for the benefit and often at the behest of its customers. Such enhancements include refreshing hardware, upgrading risk protections and information security, and offering customers additional capacity. Nevertheless, the Exchange has not increased the fees for SQF Ports and SQF Purge Ports since 2017⁸ (where inflation has been 8.62%, as measured using the metric described below). As such, the Exchange proposes to increase its fees by 8% to align to the inflation that has occurred since 2017.

As discussed below, the Exchange proposes to adjust its fees by an industry- and product-specific inflationary measure. It is reasonable and consistent with the Act for the Exchange to recoup its investments, at least in part, by adjusting its fees. Continuing to

⁶ The term "Market Makers" refers to "Competitive Market Makers" and "Primary Market Makers" collectively. See Options 1, Section 1(a)(21).

⁷ The Exchange notes that an 8% fee increase actually comes to \$1,188 per port. However the Exchange is rounding down to the nearest 5 (i.e., \$1,185) for this proposal.

⁸ See Securities Exchange Act Release No. 81882 (October 16, 2017), 82 FR 48865 (October 20, 2017) (SR-ISE-2017-87).

operate at fees frozen at 2017 levels impacts the Exchange’s ability to enhance its offerings and the interests of market participants and investors.

The fee increases the Exchange proposes are based on an industry-specific Producer Price Index (“PPI”), which is a tailored measure of inflation.⁹ As a general matter, the Producer Price Index is a family of indexes that measures the average change over time in selling prices received by domestic producers of goods and services. PPI measures price change from the perspective of the seller. This contrasts with other metrics, such as the Consumer Price Index (“CPI”), that measure price change from the purchaser’s perspective.¹⁰ About 10,000 PPIs for individual products and groups of products are tracked and released each month.¹¹ PPIs are available for the output of nearly all industries in the goods-producing sectors of the U.S. economy—mining, manufacturing, agriculture, fishing, and forestry—as well as natural gas, electricity, and construction, among others. The PPI program covers approximately 69 percent of the service sector’s output, as measured by revenue reported in the 2017 Economic Census.

For purposes of this proposal, the relevant industry-specific PPI is the Data Processing and Related Services PPI (“Data PPI”), which is an industry net-output PPI that measures the average change in selling prices received by companies that provide data processing services.

The Data PPI was introduced in January 2002 by the Bureau of Labor Statistics (“BLS”) as part of an ongoing effort to expand Producer Price Index coverage of the services sector of the U.S. economy and is identified as NAICS - 518210 in the North

⁹ See <https://fred.stlouisfed.org/series/PCU51825182#0>.

¹⁰ See <https://www.bls.gov/ppi/overview.htm>.

¹¹ See [id.](#)

American Industry Classification System.¹² According to the BLS “[t]he primary output of NAICS 518210 is the provision of electronic data processing services. In the broadest sense, computer services companies help their customers efficiently use technology. The processing services market consists of vendors who use their own computer systems—often utilizing proprietary software—to process customers’ transactions and data. Companies that offer processing services collect, organize, and store a customer’s transactions and other data for record-keeping purposes. Price movements for the NAICS 518210 index are based on changes in the revenue received by companies that provide data processing services. Each month, companies provide net transaction prices for a specified service. The transaction is an actual contract selected by probability, where the price-determining characteristics are held constant while the service is repriced. The prices used in index calculation are the actual prices billed for the selected service contract.”¹³

The Exchange believes the Data PPI is an appropriate measure to be considered in the context of the proposed pricing changes because the Exchange uses its “own computer systems” and “proprietary software,” i.e., its own data center and proprietary matching engine software, respectively, to collect, organize, store and report customers’ transactions in U.S. options securities on the Exchange’s proprietary trading platform. In other words, the Exchange is in the business of data processing and related services via its data center and proprietary matching engine software.

¹² NAICS appears in table 5 of the PPI Detailed Report and is available at <https://data.bls.gov/timeseries/PCU518210518210>.

¹³ See <https://www.bls.gov/ppi/factsheets/producer-price-index-for-the-data-processing-and-related-services-industry-naics-518210.htm>.

For purposes of this proposed rule change, the Exchange examined the Data PPI value for the period from October 2017 to October 2024. The Data PPI had a starting value of 106.7 in October 2017 and an ending value of 115.902 in October 2024, a 8.62% increase. This data indicates that companies who are also in the data storage and processing business have generally increased prices for a specified service covered under NAICS 518210 by an average of 8.62% during this period. Based on that percentage change, the Exchange proposes to make a one-time fee increase of 8%, which reflects an increase covering roughly the entire period since the last price adjustments to these fees were made.

The Exchange further believes the Data PPI is an appropriate measure for purposes of the proposed rule change on the basis that it is a stable metric with limited volatility, unlike other consumer-side inflation metrics. In fact, the Data PPI has not experienced a greater than 2.16% increase for any one calendar year period since Data PPI was introduced into the PPI in January 2002. The average calendar year change from January 2002 to December 2023 was .62%, with a cumulative increase of 15.67% over this 21-year period. The Exchange believes the Data PPI is considerably less volatile than other inflation metrics such as CPI, which has had individual calendar-year increases of more than 6.5%, and a cumulative increase of over 73% over the same period.¹⁴

The Exchange believes the Data PPI, and significant investments into, and enhanced performance of, the Exchange support the reasonableness of the proposed fee increases.¹⁵

¹⁴ See <https://www.usinflationcalculator.com/>.

¹⁵ See *supra* discussion of SQF Port and SQF Purge Port enhancements. Additionally, other exchanges have filed for increases in certain fees, based in part on comparisons to inflation. See,

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,¹⁶ in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,¹⁷ in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

This belief is based on two factors. First, the current fees do not properly reflect the quality of the SQF and SQF Purge Ports, as fees for these offerings have been static in nominal terms, and therefore falling in real terms due to inflation. Second, the Exchange believes that investments made in enhancing the risk protections and capacity of SQF and SQF Purge Ports has increased the performance of these offerings.

The Proposed Rule Change Is Reasonable

As noted above, the Exchange has not increased any of the fees included in the proposal since 2017. However, in the years following the last fee increases, the Exchange has made significant investments in upgrades to its SQF Ports and SQF Purge Ports, enhancing the quality of its services, as measured by, among other things, increased capacity. In other words, Exchange customers have greatly benefitted, while the Exchange's ability to recoup its investments has been hampered. Between 2017 and 2024, the inflation rate is 3.66% per year, on average, producing a cumulative inflation

e.g., Securities Exchange Act Release Nos. 34-100994 (September 10, 2024), 89 FR 75612 (September 16, 2024) (SR-NYSEARCA-2024-79); and 34-101519 (November 5, 2024), 89 FR 89071 (November 12, 2024) (SR-CboeBYX-2024-039).

¹⁶ 15 U.S.C. 78f(b).

¹⁷ 15 U.S.C. 78f(b)(4) and (5).

rate of 28.63%.¹⁸ Using the more targeted inflation number of Data PPI, the cumulative inflation rate was 8.62%. The Exchange believes the Data PPI is a reasonable metric to base this fee increase on because it is targeted to producer-side increases in the data processing industry.

Notwithstanding inflation, as noted above, the Exchange has not increased its fees at all for seven years for the SQF and SQF Purge Ports. The proposed fee changes represent a modest increase from the current fees. The Exchange believes the proposed fee increase is reasonable in light of the Exchange's continued expenditure in maintaining a robust technology ecosystem. Furthermore, the Exchange continues to invest in maintaining and enhancing its port products – for the benefit and often at the behest of its customers and global investors. Such enhancements include refreshing several aspects of the technology ecosystem including software, hardware, and network while introducing new and innovative products. The goal of the enhancements discussed above, among other things, is to provide more modern connectivity to the match engine. Accordingly, the Exchange continues to expend resources to innovate and modernize its technology so that it may benefit its members in offering SQF and SQF Purge Ports.

The Proposed Fees Are Equitably Allocated and Not Unfairly Discriminatory

The Exchange believes that the proposal represents an equitable allocation of reasonable dues, fees, and other charges because they would apply uniformly to all Market Makers that subscribe to SQF and SQF Purge Ports to quote on the Exchange. Market Makers are the only market participants that are assessed SQF Port and SQF Purge Port fees because they are the only market participants that are permitted to quote

¹⁸ See <https://www.officialdata.org/us/inflation/2017?amount=1>.

on the Exchange.¹⁹ These liquidity providers are critical market participants in that they are the only market participants that provide liquidity to the Exchange on a continuous basis. SQF Ports and SQF Purge Ports are only utilized in a Market Maker's assigned options series.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed pricing changes will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Intra-market Competition

The Exchange believes that the proposed fees do not put any market participants at a relative disadvantage compared to other market participants. As noted above, the Exchange would apply the proposed 8% increase to the SQF Port and SQF Purge Port fees to all Market Makers uniformly. Market Makers are the only market participants that are assessed SQF Port and SQF Purge Port fees because they are the only market participants that are permitted to quote on the Exchange. These liquidity providers are critical market participants in that they are the only market participants that provide liquidity to the Exchange on a continuous basis. SQF Ports and SQF Purge Ports are only utilized in a Market Maker's assigned options series.

Intermarket Competition

The Exchange believes that the proposed fees do not impose a burden on intermarket competition or on other SROs that is not necessary or appropriate. In

¹⁹ Unlike other market participants, Market Makers are subject to market making and quoting obligations. See Options 2, Sections 4 and 5.

determining the proposed fees, the Exchange utilized an objective and stable metric with limited volatility. Utilizing Data PPI over a specified period of time is a reasonable means of recouping the Exchange's investment in maintaining and enhancing its port offerings such as the SQF and SQF Purge Ports. The Exchange believes utilizing Data PPI, a tailored measure of inflation, to increase the fees for the SQF Port and SQF Purge Port, to recoup the Exchange's investment in maintaining and enhancing such offerings would not impose a burden on intermarket competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.²⁰ At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

²⁰ 15 U.S.C. 78s(b)(3)(A)(ii).

Electronic Comments:

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-ISE-2024-64 on the subject line.

Paper Comments:

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-ISE-2024-64. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or

subject to copyright protection. All submissions should refer to file number SR-ISE-2024-64 and should be submitted on or before [INSERT DATE 21 DAYS AFTER DATE OF PUBLICATION IN THE *FEDERAL REGISTER*].

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²¹

Sherry R. Haywood,

Assistant Secretary.
