Add Remove View

SR-NASDAQ-2024-088 Exhibit 5.docx

The self-regulatory organization may choose to attach as Exhibit 5 proposed changes to rule text in place of providing it in Item I and which may otherwise be more easily readable if provided separately from Form 19b-4. Exhibit 5 shall be considered part of the proposed rule change

Partial Amendment

Add Remove View

If the self-regulatory organization is amending only part of the text of a lengthy proposed rule change, it may, with the Commission's permission, file only those portions of the text of the proposed rule change in which changes are being made if the filing (i.e. partial amendment) is clearly understandable on its face. Such partial amendment shall be clearly identified and marked to show deletions and additions.

1. Text of the Proposed Rule Change

(a) The Nasdaq Stock Market LLC (“Nasdaq” or “Exchange”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)¹ and Rule 19b-4 thereunder,² is filing with the Securities and Exchange Commission (“SEC” or “Commission”) a proposal to amend The Nasdaq Options Market LLC (“NOM”) Rules at Options 1, Section 1, Definitions, to amend the definitions of “class” and “series”.

A notice of the proposed rule change for publication in the Federal Register is attached as Exhibit 1.

(b) Not applicable.

(c) Not applicable.

2. Procedures of the Self-Regulatory Organization

The proposed rule change was approved by senior management of the Exchange pursuant to authority delegated by the Board of Directors (the “Board”). Exchange staff will advise the Board of any action taken pursuant to delegated authority. No other action is necessary for the filing of the rule change.

Questions and comments on the proposed rule change may be directed to:

Angela Saccomandi Dunn
Principal Associate General Counsel
Nasdaq, Inc.
(215) 496-5692

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

3. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

a. Purpose

The Exchange proposes to amend NOM Rules at Options 1, Section 1, Definitions and Options 3, Section 15, Risk Protections. Specifically, the Exchange proposes to: (1) amend the definition of “class” and “series; (2) amend rule text related to the Acceptable Trade Range; and (3) reserve Options 3A.

Options 1, Section 1

The Exchange proposes to amend the definition of class at Options 1, Section 1(a)(8) to align the definition of class which currently states,

The term “class” means, when applied to options, all option contracts of the same type and style covering the same underlying interest; provided, however, that OTC options and listed options that would otherwise constitute a single class of options shall constitute separate classes. When applied to futures, the term “class” means all futures covering the same underlying interest.

The Exchange proposes to amend the defined term “class” to “class of options” and align the defined term to the description of “class of options” on Nasdaq ISE, LLC (“ISE”), Nasdaq GEMX, LLC (“GEMX”), and Nasdaq MRX, LLC (“MRX”) at Options 1, Section 1(a)(8). As proposed, a “class of options” means all options contracts covering the same underlying security.

The current definition of class corresponds to the definition as used when options trading began on the Exchange in the 1970s. However, as options trading grew, the term class became understood to include both puts and calls. This is consistent with current industry use of the term “class” and use of the term class throughout the Exchange’s Rules. Because a class is generally understood to include both puts and calls, which are

types of series, not separate classes, the current definition of class is outdated. As described above, options with the same exercise price and expiration date that are puts constitute one series, and options with the same exercise price and expiration date that are calls constitute another series. This is also the case for options classes with different styles (i.e., American or European).³ Options with different styles are considered to be one class. The proposed definition is a more accurate definition of what options constitute a class today on the Exchange.

Additionally, the Exchange notes that the rule text related to OTC options and listed options which provides, "...provided, however, that OTC options⁴ and listed options that would otherwise constitute a single class of options shall constitute separate classes" is being removed because the Exchange's options rules apply to listed options only. The Exchange's options rules do not mention OTC options. There is no necessity to describe OTC options in the definition of class as the Exchange's listing and trading and other options rules apply to listed options only which overlie securities. Further, the Exchange notes that the rule text related to futures which provides, "[w]hen applied to futures, the term "class" means all futures covering the same underlying interest" is being removed because the Exchange's options rules do not apply to futures. While futures are

³ The term "American-style option" means an options contract that, subject to the provisions of Options 5, Section 101 of these NOM Rules (relating to the cutoff time for exercise instructions) and to the Rules of the Clearing Corporation, may be exercised at any time from its commencement time until its expiration. See NOM Options 1, Section 1(a)(4). The term "European-style option" means an options contract that, subject to the provisions of Options 5, Section 101 of these Rules (relating to the cutoff time for exercise instructions) and to the Rules of the Clearing Corporation, can be exercised only on the business day of expiration, or, in the case of option contracts expiring on a day that is not a business day, the last business day prior to its expiration date. See NOM Options 1, Section 1(a)(18).

⁴ An OTC option contract is defined as an option contract that is not listed on a National Securities Exchange or cleared at The Options Clearing Corporation.

mentioned in contexts that apply to related instruments, NOM's listing and trading and other options rules apply to listed options only which overlie securities. The Exchange believes there is no necessity to retain this language.

This proposed rule change would harmonize NOM's definition to ISE, GEMX and MRX.⁵ Further, the Miami International Securities Exchange, LLC ("MIAX"), MEMX LLC ("MEMX"), Cboe Exchange, Inc. ("Cboe"), and NYSE Arca, Inc. ("NYSE Arca") all have definitions for class of options that are substantially similar.⁶

The Exchange also proposes to amend the definition of series at Options 1, Section 1(a)(55) to align the definition of series which currently states,

The term "series," when used in respect of options, means all option contracts of the same class and having otherwise identical terms including exercise price (or, in the case of delayed start option contracts that do not yet have a set exercise price, the same exercise price setting formula and exercise price setting date), expiration date, unit of trading and, in the case of futures options or commodity options, series marker if any; and when used in respect of futures, means all futures of the same class having identical terms, including the same maturity date and series marker, if any.

The Exchange proposes to amend the defined term "series" to "series of options" and align the defined term to the description of "series of options" on ISE at Options 1, Section 1(a)(47), GEMX and MRX at Options 1, Section 1(a)(46). As proposed, a "series of options" means all options contracts of the same class having the same exercise price and expiration date. Series of options consists of options of the same type. This is

⁵ See ISE, GEMX and MRX Options 1, Section 1(a)(8).

⁶ MIAX's Rule 100 provides that the terms "class of options" or "option class" mean all option contracts covering the same underlying security. MEMX Rule 16.1 provides that the terms "class" or "class of options" mean all options contracts with the same unit of trading covering the same underlying security or index. Cboe Rule 1.1 provides that the term "class" means all option contracts with the same unit of trading covering the same underlying security or index. NYSE Arca Rule 1.1 provides that the term "class of options" or "class" means all series of options, both puts and calls, overlying the same underlying security.

consistent with current industry use of the term “series” and use of the term series throughout the Exchange’s Rules. The proposed text would create a more accurate definition of what options constitute a series today on the Exchange.

Additionally, the Exchange is removing the reference to delayed start option contracts in the rule text which provides, “...(or, in the case of delayed start option contracts that do not yet have a set exercise price, the same exercise price setting formula and exercise price setting date)” as that language is not relevant. Today, NOM’s options rules do not reference delayed start option contracts. The Exchange notes that OCC’s By-Laws defines the term “delayed start option” to mean “an option that at the commencement of trading does not have an exercise price but instead has an exercise price setting formula pursuant to which the exercise price will be fixed on the exercise price setting date for the series of delayed start option” at Article 1, Section 1 of the OCC’s By-Laws. NOM does not define a similar term in its options rules or utilizing such options. For these reasons, that parenthetical is being eliminated.

This proposed rule change would harmonize NOM’s definition to ISE at Options 1, Section 1(a)(47), GEMX and MRX at Options 1, Section 1(a)(46). The proposed change would be similar to definitions for series of options at MIAX, MEMX, Cboe, and NYSE Arca.⁷

⁷ MIAX’s Rule 100 provides that the term “series of options” means all option contracts of the same class having the same exercise price and expiration date. MEMX Rule 16.1 provides that the terms “series” or “series of options” mean all options contracts of the same class that are the same type of options and have the same exercise price and expiration date. Cboe Rule 1.1 provides that the terms “series” and “series of options” mean all option contracts of the same class that are the same type of option and have the same exercise price and expiration date. NYSE Arca Rule 1.1 provides that the term “series of options,” “options series,” or “series” means all options contracts of the same class of options having the same expiration date and expiration price, and the same unit of trading.

Options 3, Section 15

The Exchange proposes to amend Options 3, Section 15(b)(1)(A), Acceptable Trade Range, to add “quotes” in two places that were inadvertently missed and correct a typographical error with “Participants”.⁸ Today, the Acceptable Trade Range considers both quotes and orders. The Exchange inadvertently left out the word “quote” in two places. The typographical correction changes “Participants” to the singular “Participant.” A similar change was made on The Nasdaq Stock Market, LLC related to Acceptable Trade Range previously.⁹

Finally, the Exchange proposes reserve Options 3A. The Exchange is proposing rules in Options 3A on Nasdaq ISE, LLC and will not have similar rules on NOM.

b. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,¹⁰ in general, and furthers the objectives of Section 6(b)(5) of the Act,¹¹ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

Options 1, Section 1

⁸ The term “Options Participant” or “Participant” mean a firm, or organization that is registered with the Exchange pursuant to Options 2A of these Rules for purposes of participating in options trading on NOM as a “Nasdaq Options Order Entry Firm” or “Nasdaq Options Market Maker”. See Options 1, Section 1(a)(39).

⁹ See Securities Exchange Release Act No. 97870 (July 10, 2023), 88 FR 45248 (July 14, 2023) (SR-NASDAQ-2023-018). In this rule change, a similar change was made to add the word “quote” where it was inadvertently omitted. The Acceptable Trade Range Rule in BX, which is similar to NOM, applies to quotes and orders.

¹⁰ 15 U.S.C. 78f(b).

¹¹ 15 U.S.C. 78f(b)(5).

Amending the definition of “class” at Options 1, Section 1(a)(8) and the definition of “series” at Options 1, Section 1(a)(55) is consistent with the Act as the new terms will provide a more accurate description of these terms that is consistent with current industry use and use of the terms throughout the Exchange’s Rules. A class is generally understood to include both puts and calls, which are types of series, not separate classes, the current definition of class is outdated. Also, options with different styles are considered to be the same class. Removing references to OTC is consistent with the Act because the Exchange’s rules apply to listed options only. The Exchange’s rules do not mention OTC options. There is no necessity to describe OTC options in the definition of class as the Exchange’s listing and trading and other rules apply to listed options only which overlie securities. Further, removing references to futures is consistent with the Act because the Exchange’s rules do not apply to futures. While futures are mentioned in contexts that apply to related instruments, NOM’s listing and trading and other rules apply to listed options only which overlie securities. The Exchange believes there is no necessity to retain this language. This proposed rule change would harmonize NOM’s definition to ISE, GEMX and MRX.¹² Further, MIAX, MEMX, Cboe, and NYSE Arca all have definitions for class of options that are substantially similar.¹³

The Exchange proposes to amend the defined term “series” to “series of options” and align the defined term to the description of “series of options” on ISE at Options 1,

¹² See ISE, GEMX and MRX Options 1, Section 1(a)(8).

¹³ MIAX’s Rule 100 provides that the terms “class of options” or “option class” mean all option contracts covering the same underlying security. MEMX Rule 16.1 provides that the terms “class” or “class of options” mean all options contracts with the same unit of trading covering the same underlying security or index. Cboe Rule 1.1 provides that the term “class” means all option contracts with the same unit of trading covering the same underlying security or index. NYSE Arca Rule 1.1 provides that the term “class of options” or “class” means all series of options, both puts and calls, overlying the same underlying security.

Section 1(a)(47), GEMX and MRX at Options 1, Section 1(a)(46) is consistent with the Act. As proposed, a “series of options” means all options contracts of the same class having the same exercise price and expiration date. Series of options consists of options of the same type. This is consistent with current industry use of the term “series” and use of the term series throughout the Exchange’s Rules. The proposed text would create a more accurate definition of what options constitute a series today on the Exchange. Removing references to delayed start option contracts in the rule text is consistent with the Act because that language is not relevant. Today, NOM’s rules do not reference delayed start option contracts. The Exchange notes that OCC’s By-Laws defines the term “delayed start option” to mean “an option that at the commencement of trading does not have an exercise price but instead has an exercise price setting formula pursuant to which the exercise price will be fixed on the exercise price setting date for the series of delayed start option” at Article 1, Section 1 of the OCC’s By-Laws. NOM does not define a similar term in its rules or utilizing such options. For these reasons, that parenthetical is being eliminated. This proposed rule change would harmonize NOM’s definition to ISE at Options 1, Section 1(a)(47), GEMX and MRX at Options 1, Section 1(a)(46). The proposed change would be similar to definitions for series of options at MIAX, MEMX, Cboe, and NYSE Arca.¹⁴

Options 3, Section 15

¹⁴ MIAX’s Rule 100 provides that the term “series of options” means all option contracts of the same class having the same exercise price and expiration date. MEMX Rule 16.1 provides that the terms “series” or “series of options” mean all options contracts of the same class that are the same type of options and have the same exercise price and expiration date. Cboe Rule 1.1 provides that the terms “series” and “series of options” mean all option contracts of the same class that are the same type of option and have the same exercise price and expiration date. NYSE Arca Rule 1.1 provides that the term “series of options,” “options series,” or “series” means all options contracts of the same class of options having the same expiration date and expiration price, and the same unit of trading.

The Exchange's proposal to amend Options 3, Section 15(b)(1)(A), Acceptable Trade Range, to add "quotes" in two places that were inadvertently missed and correct a typographical error with "Participants" are non-substantive amendments.

Finally, the Exchange's proposal to reserve Options 3A is a non-substantive rule change.

4. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Options 1, Section 1

The Exchange's proposal to amend the definition of "class" at Options 1, Section 1(a)(8) and the definition of "series" at Options 1, Section 1(a)(55) do not impose an undue burden on intra-market competition as the use of these terms would apply uniformly to all NOM Participants.

The Exchange's proposal to amend the definition of "class" at Options 1, Section 1(a)(8) does not impose an undue burden on intermarket competition as other exchanges have similar definitions.¹⁵ The Exchange's proposal to amend the definition of "series" at Options 1, Section 1(a)(55) does not impose an undue burden on intermarket competition as other exchanges have similar definitions.¹⁶

¹⁵ ISE, GEMX and MRX definitions of "class of options" at Options 1, Section 1(a)(8) are identical. Also, MIAX, MEMX, Cboe, and NYSE Arca, Inc. all have definitions for class of options that are substantially similar. MIAX's Rule 100 provides that the terms "class of options" or "option class" mean all option contracts covering the same underlying security. MEMX Rule 16.1 provides that the terms "class" or "class of options" mean all options contracts with the same unit of trading covering the same underlying security or index. Cboe Rule 1.1 provides that the term "class" means all option contracts with the same unit of trading covering the same underlying security or index. NYSE Arca Rule 1.1 provides that the term "class of options" or "class" means all series of options, both puts and calls, overlying the same underlying security.

¹⁶ ISE, GEMX and MRX definitions of "series of options" at ISE at Options 1, Section 1(a)(47), GEMX and MRX at Options 1, Section 1(a)(46) are identical. Also, MIAX, MEMX, Cboe, and

Options 3, Section 15

The Exchange's proposal to amend Options 3, Section 15(b)(1)(A), Acceptable Trade Range, to add "quotes" in two places that were inadvertently missed and correct a typographical error with "Participants" are non-substantive amendments.

Finally, the Exchange's proposal to reserve Options 3A is a non-substantive rule change.

5. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

6. Extension of Time Period for Commission Action

Not applicable.

7. Basis for Summary Effectiveness Pursuant to Section 19(b)(3) or for Accelerated Effectiveness Pursuant to Section 19(b)(2)

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(iii)¹⁷ of the Act and Rule 19b-4(f)(6) thereunder¹⁸ in that it effects a change that: (i) does not significantly affect the protection of investors or the public interest; (ii) does not impose any significant burden on competition; and (iii) by its terms, does not become operative for 30 days after the date of the filing, or such shorter time as the

NYSE Arca, Inc. all have definitions for series of options that are substantially similar. MIAX's Rule 100 provides that the term "series of options" means all option contracts of the same class having the same exercise price and expiration date. MEMX Rule 16.1 provides that the terms "series" or "series of options" mean all options contracts of the same class that are the same type of options and have the same exercise price and expiration date. Cboe Rule 1.1 provides that the terms "series" and "series of options" mean all option contracts of the same class that are the same type of option and have the same exercise price and expiration date. NYSE Arca Rule 1.1 provides that the term "series of options," "options series," or "series" means all options contracts of the same class of options having the same expiration date and expiration price, and the same unit of trading.

¹⁷ 15 U.S.C. 78s(b)(3)(A)(iii).

¹⁸ 17 CFR 240.19b-4(f)(6).

Commission may designate if consistent with the protection of investors and the public interest.

The Exchange's proposal does not significantly affect the protection of investors or the public interest, because amending the definition of "class" at Options 1, Section 1(a)(8) and the definition of "series" at Options 1, Section 1(a)(55) will provide a more accurate description of these terms that is consistent with current industry use and use of the terms throughout the Exchange's Rules. A class is generally understood to include both puts and calls, which are types of series, not separate classes, the current definition of class is outdated. Removing references to OTC is consistent with the Act because the Exchange's rules apply to listed options only. The Exchange's rules do not mention OTC options. There is no necessity to describe OTC options in the definition of class as the Exchange's listing and trading and other rules apply to listed options only which overlie securities. Further, removing references to futures is consistent with the Act because the Exchange's rules do not apply to futures. While futures are mentioned in contexts that apply to related instruments, NOM's listing and trading and other rules apply to listed options only which overlie securities. The Exchange believes there is no necessity to retain this language. This proposed rule change would harmonize NOM's definition to ISE, GEMX and MRX.¹⁹ Further, MIAX, MEMX, Cboe, and NYSE Arca all have definitions for class of options that are substantially similar.²⁰ The Exchange proposes to

¹⁹ See ISE, GEMX and MRX Options 1, Section 1(a)(8).

²⁰ MIAX's Rule 100 provides that the terms "class of options" or "option class" mean all option contracts covering the same underlying security. MEMX Rule 16.1 provides that the terms "class" or "class of options" mean all options contracts with the same unit of trading covering the same underlying security or index. Cboe Rule 1.1 provides that the term "class" means all option contracts with the same unit of trading covering the same underlying security or index. NYSE Arca Rule 1.1 provides that the term "class of options" or "class" means all series of options, both puts and calls, overlying the same underlying security.

amend the defined term “series” to “series of options” and align the defined term to the description of “series of options” on ISE at Options 1, Section 1(a)(47), GEMX and MRX at Options 1, Section 1(a)(46) does not significantly affect the protection of investors or the public interest. As proposed, a “series of options” means all options contracts of the same class having the same exercise price and expiration date. Series of options consists of options of the same type. This is consistent with current industry use of the term “series” and use of the term series throughout the Exchange’s Rules. The proposed text would create a more accurate definition of what options constitute a series today on the Exchange. Removing references to delayed start option contracts in the rule text is consistent with the Act because that language is not relevant. Today, NOM’s rules do not reference delayed start option contracts. The Exchange notes that OCC’s By-Laws defines the term “delayed start option” to mean “an option that at the commencement of trading does not have an exercise price but instead has an exercise price setting formula pursuant to which the exercise price will be fixed on the exercise price setting date for the series of delayed start option” at Article 1, Section 1 of the OCC’s By-Laws. NOM does not define a similar term in its rules or utilizing such options. For these reasons, that parenthetical is being eliminated. This proposed rule change would harmonize Phlx’s definition to ISE at Options 1, Section 1(a)(47), GEMX and MRX at Options 1, Section 1(a)(46). The proposed change would be similar to definitions for series of options at MIAX, MEMX, Cboe, and NYSE Arca.²¹

²¹ MIAX’s Rule 100 provides that the term “series of options” means all option contracts of the same class having the same exercise price and expiration date. MEMX Rule 16.1 provides that the terms “series” or “series of options” mean all options contracts of the same class that are the same type of options and have the same exercise price and expiration date. Cboe Rule 1.1 provides that the terms “series” and “series of options” mean all option contracts of the same class that are the same type of option and have the same exercise price and expiration date. NYSE Arca Rule 1.1 provides that the term “series of options,” “options series,” or “series” means all options contracts

The Exchange’s proposal does not impose an undue burden on competition as the definitions of “series of options” and “class of options” would apply uniformly to all member organizations.

The Exchange’s proposal does not impose an undue burden on competition as the definitions of “series of options” and “class of options” would apply uniformly to all Participants. Finally, the proposal to amend Options 3, Section 15(b)(1)(A), Acceptable Trade Range, to add “quotes” in two places that were inadvertently missed and correct a typographical error with “Participants” are non-substantive amendments, as is reserving Options 3A.

Furthermore, Rule 19b-4(f)(6)(iii)²² requires a self-regulatory organization to give the Commission written notice of its intent to file a proposed rule change under that subsection at least five business days prior to the date of filing, or such shorter time as designated by the Commission. The Exchange has provided such notice.

8. Proposed Rule Change Based on Rules of Another Self-Regulatory Organization or of the Commission

The Exchange’s proposal to amend the definition of “class” at Options 1, Section 1(a)(8) would align the rule text identically to ISE, GEMX and MRX definitions of “class of options” at Options 1, Section 1(a)(8). The Exchange’s proposal to amend the definition of “series” at Options 1, Section 1(a)(55) would align the rule text identically to ISE, GEMX and MRX definitions of “series of options” at ISE at Options 1, Section 1(a)(47), GEMX and MRX at Options 1, Section 1(a)(46).

of the same class of options having the same expiration date and expiration price, and the same unit of trading.

SECURITIES AND EXCHANGE COMMISSION
(Release No. _____ ; File No. SR-NASDAQ-2024-088)

December __, 2024

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Amend the Definitions of “Class” and “Series”

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 20, 2024, The Nasdaq Stock Market LLC (“Nasdaq” or “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend The Nasdaq Options Market LLC (“NOM”) Rules at Options 1, Section 1, Definitions, to amend the definitions of “class” and “series”.

The text of the proposed rule change is available on the Exchange’s Website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend NOM Rules at Options 1, Section 1, Definitions and Options 3, Section 15, Risk Protections. Specifically, the Exchange proposes to: (1) amend the definition of “class” and “series; (2) amend rule text related to the Acceptable Trade Range; and (3) reserve Options 3A.

Options 1, Section 1

The Exchange proposes to amend the definition of class at Options 1, Section 1(a)(8) to align the definition of class which currently states,

The term “class” means, when applied to options, all option contracts of the same type and style covering the same underlying interest; provided, however, that OTC options and listed options that would otherwise constitute a single class of options shall constitute separate classes. When applied to futures, the term “class” means all futures covering the same underlying interest.

The Exchange proposes to amend the defined term “class” to “class of options” and align the defined term to the description of “class of options” on Nasdaq ISE, LLC (“ISE”), Nasdaq GEMX, LLC (“GEMX”), and Nasdaq MRX, LLC (“MRX”) at Options 1,

Section 1(a)(8). As proposed, a “class of options” means all options contracts covering the same underlying security.

The current definition of class corresponds to the definition as used when options trading began on the Exchange in the 1970s. However, as options trading grew, the term class became understood to include both puts and calls. This is consistent with current industry use of the term “class” and use of the term class throughout the Exchange’s Rules. Because a class is generally understood to include both puts and calls, which are types of series, not separate classes, the current definition of class is outdated. As described above, options with the same exercise price and expiration date that are puts constitute one series, and options with the same exercise price and expiration date that are calls constitute another series. This is also the case for options classes with different styles (i.e., American or European).³ Options with different styles are considered to be one class. The proposed definition is a more accurate definition of what options constitute a class today on the Exchange.

Additionally, the Exchange notes that the rule text related to OTC options and listed options which provides, “...provided, however, that OTC options⁴ and listed options that would otherwise constitute a single class of options shall constitute separate

³ The term “American-style option” means an options contract that, subject to the provisions of Options 5, Section 101 of these NOM Rules (relating to the cutoff time for exercise instructions) and to the Rules of the Clearing Corporation, may be exercised at any time from its commencement time until its expiration. See NOM Options 1, Section 1(a)(4). The term “European-style option” means an options contract that, subject to the provisions of Options 5, Section 101 of these Rules (relating to the cutoff time for exercise instructions) and to the Rules of the Clearing Corporation, can be exercised only on the business day of expiration, or, in the case of option contracts expiring on a day that is not a business day, the last business day prior to its expiration date. See NOM Options 1, Section 1(a)(18).

⁴ An OTC option contract is defined as an option contract that is not listed on a National Securities Exchange or cleared at The Options Clearing Corporation.

classes” is being removed because the Exchange’s options rules apply to listed options only. The Exchange’s options rules do not mention OTC options. There is no necessity to describe OTC options in the definition of class as the Exchange’s listing and trading and other options rules apply to listed options only which overlie securities. Further, the Exchange notes that the rule text related to futures which provides, “[w]hen applied to futures, the term “class” means all futures covering the same underlying interest” is being removed because the Exchange’s options rules do not apply to futures. While futures are mentioned in contexts that apply to related instruments, NOM’s listing and trading and other options rules apply to listed options only which overlie securities. The Exchange believes there is no necessity to retain this language.

This proposed rule change would harmonize NOM’s definition to ISE, GEMX and MRX.⁵ Further, the Miami International Securities Exchange, LLC (“MIAX”), MEMX LLC (“MEMX”), Cboe Exchange, Inc. (“Cboe”), and NYSE Arca, Inc. (“NYSE Arca”) all have definitions for class of options that are substantially similar.⁶

The Exchange also proposes to amend the definition of series at Options 1, Section 1(a)(55) to align the definition of series which currently states,

The term “series,” when used in respect of options, means all option contracts of the same class and having otherwise identical terms including exercise price (or, in the case of delayed start option contracts that do not yet have a set exercise price, the same exercise price setting formula and exercise price setting date), expiration date, unit of trading and, in the case of futures options or commodity options, series marker if any; and when

⁵ See ISE, GEMX and MRX Options 1, Section 1(a)(8).

⁶ MIAX’s Rule 100 provides that the terms “class of options” or “option class” mean all option contracts covering the same underlying security. MEMX Rule 16.1 provides that the terms “class” or “class of options” mean all options contracts with the same unit of trading covering the same underlying security or index. Cboe Rule 1.1 provides that the term “class” means all option contracts with the same unit of trading covering the same underlying security or index. NYSE Arca Rule 1.1 provides that the term “class of options” or “class” means all series of options, both puts and calls, overlying the same underlying security.

used in respect of futures, means all futures of the same class having identical terms, including the same maturity date and series marker, if any.

The Exchange proposes to amend the defined term “series” to “series of options” and align the defined term to the description of “series of options” on ISE at Options 1, Section 1(a)(47), GEMX and MRX at Options 1, Section 1(a)(46). As proposed, a “series of options” means all options contracts of the same class having the same exercise price and expiration date. Series of options consists of options of the same type. This is consistent with current industry use of the term “series” and use of the term series throughout the Exchange’s Rules. The proposed text would create a more accurate definition of what options constitute a series today on the Exchange.

Additionally, the Exchange is removing the reference to delayed start option contracts in the rule text which provides, “...(or, in the case of delayed start option contracts that do not yet have a set exercise price, the same exercise price setting formula and exercise price setting date)” as that language is not relevant. Today, NOM’s options rules do not reference delayed start option contracts. The Exchange notes that OCC’s By-Laws defines the term “delayed start option” to mean “an option that at the commencement of trading does not have an exercise price but instead has an exercise price setting formula pursuant to which the exercise price will be fixed on the exercise price setting date for the series of delayed start option” at Article 1, Section 1 of the OCC’s By-Laws. NOM does not define a similar term in its options rules or utilizing such options. For these reasons, that parenthetical is being eliminated.

This proposed rule change would harmonize NOM’s definition to ISE at Options 1, Section 1(a)(47), GEMX and MRX at Options 1, Section 1(a)(46). The proposed

change would be similar to definitions for series of options at MIAX, MEMX, Cboe, and NYSE Arca.⁷

Options 3, Section 15

The Exchange proposes to amend Options 3, Section 15(b)(1)(A), Acceptable Trade Range, to add “quotes” in two places that were inadvertently missed and correct a typographical error with “Participants”.⁸ Today, the Acceptable Trade Range considers both quotes and orders. The Exchange inadvertently left out the word “quote” in two places. The typographical correction changes “Participants” to the singular “Participant.” A similar change was made on The Nasdaq Stock Market, LLC related to Acceptable Trade Range previously.⁹

Finally, the Exchange proposes reserve Options 3A. The Exchange is proposing rules in Options 3A on Nasdaq ISE, LLC and will not have similar rules on NOM.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the

⁷ MIAX’s Rule 100 provides that the term “series of options” means all option contracts of the same class having the same exercise price and expiration date. MEMX Rule 16.1 provides that the terms “series” or “series of options” mean all options contracts of the same class that are the same type of options and have the same exercise price and expiration date. Cboe Rule 1.1 provides that the terms “series” and “series of options” mean all option contracts of the same class that are the same type of option and have the same exercise price and expiration date. NYSE Arca Rule 1.1 provides that the term “series of options,” “options series,” or “series” means all options contracts of the same class of options having the same expiration date and expiration price, and the same unit of trading.

⁸ The term “Options Participant” or “Participant” mean a firm, or organization that is registered with the Exchange pursuant to Options 2A of these Rules for purposes of participating in options trading on NOM as a “Nasdaq Options Order Entry Firm” or “Nasdaq Options Market Maker”. See Options 1, Section 1(a)(39).

⁹ See Securities Exchange Release Act No. 97870 (July 10, 2023), 88 FR 45248 (July 14, 2023) (SR-NASDAQ-2023-018). In this rule change, a similar change was made to add the word “quote” where it was inadvertently omitted. The Acceptable Trade Range Rule in BX, which is similar to NOM, applies to quotes and orders.

Act,¹⁰ in general, and furthers the objectives of Section 6(b)(5) of the Act,¹¹ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

Options 1, Section 1

Amending the definition of “class” at Options 1, Section 1(a)(8) and the definition of “series” at Options 1, Section 1(a)(55) is consistent with the Act as the new terms will provide a more accurate description of these terms that is consistent with current industry use and use of the terms throughout the Exchange’s Rules. A class is generally understood to include both puts and calls, which are types of series, not separate classes, the current definition of class is outdated. Also, options with different styles are considered to be the same class. Removing references to OTC is consistent with the Act because the Exchange’s rules apply to listed options only. The Exchange’s rules do not mention OTC options. There is no necessity to describe OTC options in the definition of class as the Exchange’s listing and trading and other rules apply to listed options only which overlie securities. Further, removing references to futures is consistent with the Act because the Exchange’s rules do not apply to futures. While futures are mentioned in contexts that apply to related instruments, NOM’s listing and trading and other rules apply to listed options only which overlie securities. The Exchange believes there is no necessity to retain this language. This proposed rule change would harmonize NOM’s

¹⁰ 15 U.S.C. 78f(b).

¹¹ 15 U.S.C. 78f(b)(5).

definition to ISE, GEMX and MRX.¹² Further, MIAX, MEMX, Cboe, and NYSE Arca all have definitions for class of options that are substantially similar.¹³

The Exchange proposes to amend the defined term “series” to “series of options” and align the defined term to the description of “series of options” on ISE at Options 1, Section 1(a)(47), GEMX and MRX at Options 1, Section 1(a)(46) is consistent with the Act. As proposed, a “series of options” means all options contracts of the same class having the same exercise price and expiration date. Series of options consists of options of the same type. This is consistent with current industry use of the term “series” and use of the term series throughout the Exchange’s Rules. The proposed text would create a more accurate definition of what options constitute a series today on the Exchange. Removing references to delayed start option contracts in the rule text is consistent with the Act because that language is not relevant. Today, NOM’s rules do not reference delayed start option contracts. The Exchange notes that OCC’s By-Laws defines the term “delayed start option” to mean “an option that at the commencement of trading does not have an exercise price but instead has an exercise price setting formula pursuant to which the exercise price will be fixed on the exercise price setting date for the series of delayed start option” at Article 1, Section 1 of the OCC’s By-Laws. NOM does not define a similar term in its rules or utilizing such options. For these reasons, that parenthetical is being eliminated. This proposed rule change would harmonize NOM’s definition to ISE

¹² See ISE, GEMX and MRX Options 1, Section 1(a)(8).

¹³ MIAX’s Rule 100 provides that the terms “class of options” or “option class” mean all option contracts covering the same underlying security. MEMX Rule 16.1 provides that the terms “class” or “class of options” mean all options contracts with the same unit of trading covering the same underlying security or index. Cboe Rule 1.1 provides that the term “class” means all option contracts with the same unit of trading covering the same underlying security or index. NYSE Arca Rule 1.1 provides that the term “class of options” or “class” means all series of options, both puts and calls, overlying the same underlying security.

at Options 1, Section 1(a)(47), GEMX and MRX at Options 1, Section 1(a)(46). The proposed change would be similar to definitions for series of options at MIAX, MEMX, Cboe, and NYSE Arca.¹⁴

Options 3, Section 15

The Exchange's proposal to amend Options 3, Section 15(b)(1)(A), Acceptable Trade Range, to add "quotes" in two places that were inadvertently missed and correct a typographical error with "Participants" are non-substantive amendments.

Finally, the Exchange's proposal to reserve Options 3A is a non-substantive rule change.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Options 1, Section 1

The Exchange's proposal to amend the definition of "class" at Options 1, Section 1(a)(8) and the definition of "series" at Options 1, Section 1(a)(55) do not impose an undue burden on intra-market competition as the use of these terms would apply uniformly to all NOM Participants.

The Exchange's proposal to amend the definition of "class" at Options 1, Section 1(a)(8) does not impose an undue burden on intermarket competition as other exchanges

¹⁴ MIAX's Rule 100 provides that the term "series of options" means all option contracts of the same class having the same exercise price and expiration date. MEMX Rule 16.1 provides that the terms "series" or "series of options" mean all options contracts of the same class that are the same type of options and have the same exercise price and expiration date. Cboe Rule 1.1 provides that the terms "series" and "series of options" mean all option contracts of the same class that are the same type of option and have the same exercise price and expiration date. NYSE Arca Rule 1.1 provides that the term "series of options," "options series," or "series" means all options contracts of the same class of options having the same expiration date and expiration price, and the same unit of trading.

have similar definitions.¹⁵ The Exchange’s proposal to amend the definition of “series” at Options 1, Section 1(a)(55) does not impose an undue burden on intermarket competition as other exchanges have similar definitions.¹⁶

Options 3, Section 15

The Exchange’s proposal to amend Options 3, Section 15(b)(1)(A), Acceptable Trade Range, to add “quotes” in two places that were inadvertently missed and correct a typographical error with “Participants” are non-substantive amendments.

Finally, the Exchange’s proposal to reserve Options 3A is a non-substantive rule change.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

¹⁵ ISE, GEMX and MRX definitions of “class of options” at Options 1, Section 1(a)(8) are identical. Also, MIAX, MEMX, Cboe, and NYSE Arca, Inc. all have definitions for class of options that are substantially similar. MIAX’s Rule 100 provides that the terms “class of options” or “option class” mean all option contracts covering the same underlying security. MEMX Rule 16.1 provides that the terms “class” or “class of options” mean all options contracts with the same unit of trading covering the same underlying security or index. Cboe Rule 1.1 provides that the term “class” means all option contracts with the same unit of trading covering the same underlying security or index. NYSE Arca Rule 1.1 provides that the term “class of options” or “class” means all series of options, both puts and calls, overlying the same underlying security.

¹⁶ ISE, GEMX and MRX definitions of “series of options” at ISE at Options 1, Section 1(a)(47), GEMX and MRX at Options 1, Section 1(a)(46) are identical. Also, MIAX, MEMX, Cboe, and NYSE Arca, Inc. all have definitions for series of options that are substantially similar. MIAX’s Rule 100 provides that the term “series of options” means all option contracts of the same class having the same exercise price and expiration date. MEMX Rule 16.1 provides that the terms “series” or “series of options” mean all options contracts of the same class that are the same type of options and have the same exercise price and expiration date. Cboe Rule 1.1 provides that the terms “series” and “series of options” mean all option contracts of the same class that are the same type of option and have the same exercise price and expiration date. NYSE Arca Rule 1.1 provides that the term “series of options,” “options series,” or “series” means all options contracts of the same class of options having the same expiration date and expiration price, and the same unit of trading.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁷ and subparagraph (f)(6) of Rule 19b-4 thereunder.¹⁸

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

¹⁷ 15 U.S.C. 78s(b)(3)(A)(iii).

¹⁸ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

Electronic Comments:

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NASDAQ-2024-088 on the subject line.

Paper Comments:

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-NASDAQ-2024-088. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or

subject to copyright protection. All submissions should refer to file number SR-NASDAQ-2024-088 and should be submitted on or before [INSERT DATE 21 DAYS AFTER DATE OF PUBLICATION IN THE *FEDERAL REGISTER*].

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁹

Sherry R. Haywood,

Assistant Secretary.

The Nasdaq Stock Market LLC Rules

* * * * *

Options Rules

* * * * *

Options 1 General Provisions

* * * * *

Section 1. Definitions

* * * * *

(a) With respect to these NOM Rules, the following terms shall have the meanings specified in this Rule. A term defined elsewhere in the Rules of the Exchange shall have the same meaning with respect to this Rule, unless otherwise defined below.

* * * * *

(8) The term “class of options” means[, when applied to options,] all options contracts[of the same type and style] covering the same underlying security.[interest; provided, however, that OTC options and listed options that would otherwise constitute a single class of options shall constitute separate classes. When applied to futures, the term "class" means all futures covering the same underlying interest.]

* * * * *

(55) The term “series of options[,]” [when used in respect of options,] means all options contracts of the same class [and]having [otherwise identical terms including]the same exercise price and expiration date.[(or, in the case of delayed start option contracts that do not yet have a set exercise price, the same exercise price setting formula and exercise price setting date), expiration date, unit of trading and, in the case of futures options or commodity options, series marker if any; and when used in respect of futures, means all futures of the same class having identical terms, including the same maturity date and series marker, if any.]

* * * * *

Options 3 Options Trading Rules

* * * * *

Section 15. Risk Protections

* * * * *

(b) The following are order and quote risk protections on NOM:

(1) **Acceptable Trade Range.** The System will calculate an Acceptable Trade Range to limit the range of prices at which an order/quote will be allowed to execute. The Acceptable Trade Range is calculated by taking the reference price, plus or minus a value to be determined by the Exchange. (i.e., the reference price - (x) for sell orders/quotes and the reference price + (x) for buy orders/quotes). Upon receipt of a new order/quote, the reference price is the NBB or internal best bid for sell orders/quotes and the NBO or internal best offer for buy orders/quotes or the last price at which the order/quote is posted whichever is higher for a buy order/quote or lower for a sell order/quote.

(A) If an order/quote reaches the outer limit of the Acceptable Trade Range (the "Threshold Price") without being fully executed, it will be posted at the Threshold Price for a brief period, not to exceed one second ("Posting Period"), to allow more liquidity to be collected. Upon posting, either the current Threshold Price of the order/quote or an updated NBB for buy orders/quotes or the NBO for sell orders/quotes (whichever is higher for a buy order/quote lower for a sell order/quote) then becomes the reference price for calculating a new Acceptable Trade Range. If the order/quote remains unexecuted after the Posting Period, a New Acceptable Trade Range will be calculated and the order/quote will execute, route, or post up to the new Acceptable Trade Range Threshold Price, unless a Participant[s] has requested that their quotes or orders be returned if posted at the outer limit of the Acceptable Trade Range (in which case, the quote or order will be returned). This process will repeat until either (i) the order/quote is executed, cancelled, or posted at its limit price or (ii) the order/quote has been subject to a configurable number of instances of the Acceptable Trade Range as determined by the Exchange (in which case it will be returned).
